Besides, it also provides you with Fade in/out Effect, Flexible Ringtone Management, as well as Precise Wave-form Adjustment etc.

Wanna know more? The following guide will show you how.

Step 1: Launch the Program and Connect Your iPhone

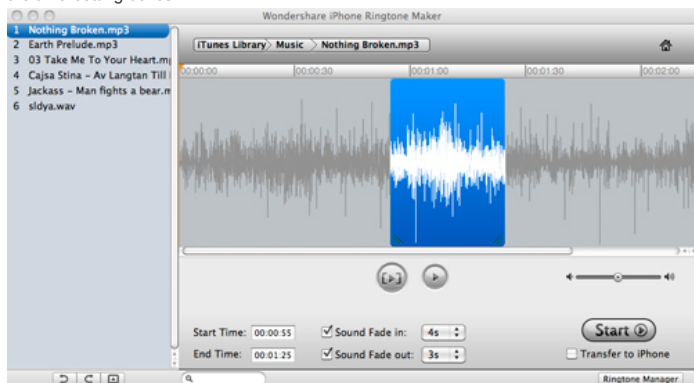

Step 2: Import a Song or Video

You can either choose a song /video in iTunes library or directly drag one from your hard disk.

Step 3: Trim the Audio/Video File to Start Making

nto

the time-setting boxes.

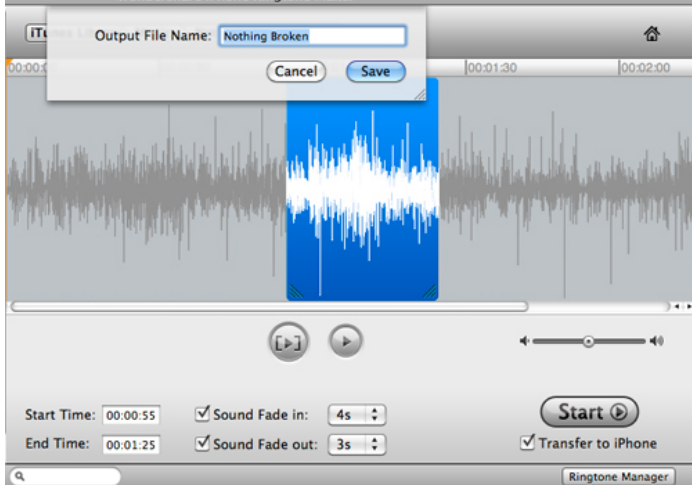

The program allows you to set the beginning and the ending effect with Fade in/out function (maximum time: 5 seconds), you can also pre-listening to the ringtone you made.

Step 4: Export Ringtone to Your iPhone

e

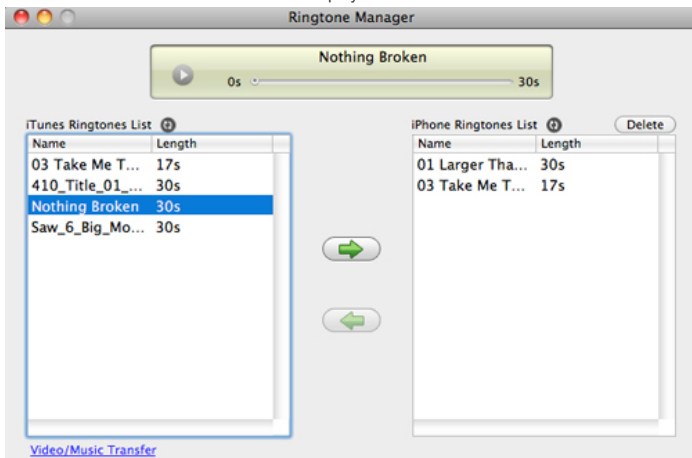

will then be in iTunes.

Tip: Here you can rename the ringtone you made

Step 5: Ringtone Manager (Optional)

Click the "Ringtone Manager" in the lower right corner. You can now manage all the ringtones by transferring them between iTunes and iPhone. You can also delete or play them.

You can now let your iPhone sing your song.
